CHALLENGE THEME 2023: Health and well-being

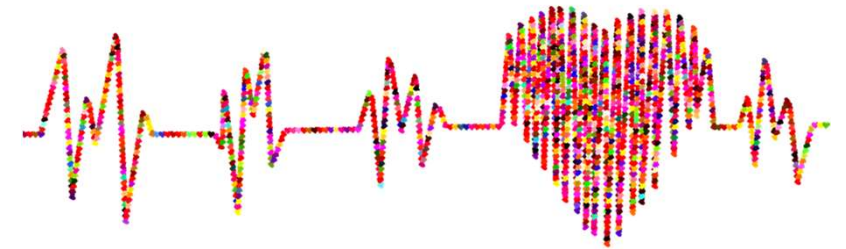

Image by Gordon Johnson from Pixabay

Possible sub-themes

Accessibility	Infectious diseases	Healthy living habits	Quality of life and well-being
Public health	Environmental health	Injuries and accidents	Medical Logistics

Multi-disciplinary teams of young scientists work in close collaboration with different stakeholders to co-create digital and social innovations with location data and digital technologies

OPEN CALL FOR COLLABORATION

We are seeking engaged partners as:

Challenge theme owners:

Does your organization have real-world health and well-being problems, and desire to solve them with location data and tech?

Digital data providers:

Does your organization have digital health related location data, which you would like to offer for teams to explore and innovate with?

Tech & innovation mentors:

Does your organization have digital health related location data, which you would like to offer for teams to explore and innovate with?

Policy-makers:

Do you have health related information needs for improved decision-making and opportunity to link solutions to public policy-making?

Financial sponsors:

Is your organization interested in supporting the challenge camps and providing young scientists with scholarships or perhaps awards for the best solutions?

POSSIBLE PARTNERS

- Health care and wellbeing organizations and institutes
- Wellbeing services counties
- Organisations providing location and statistical information
- Health and wellbeing companies
- Companies interested in extending their activities to health and wellbeing domain
- Innovation hubs and actors
- Cities, municipalities, provinces
- Enthusiastic volunteers

WE OFFER

01

New digital solutions to real-world health and well-being problems

02

Working with young talented researchers and novel data processing

03

Refined and new digital high-value data sets
